

## R-shield

Antiviral neck gaiter with nanofiber membrane\*

We declare that the original antiviral R-shield/R-shield Light neck gaiter:\*\*

- contains a sewed-in RESPILON® nanofiber membrane in the area of a person's nose and mouth which blocks out 99.9 % of viruses and bacteria;
- the nanofiber membrane complies to the mandatory level of more than 95% filtration efficiency, and according to the results of independent testing the measured filtration efficiency corresponds to FFP2 (the testing results can be found in issue 12/2020 of the Czech magazine dTest).
  - \* R-shield is not medical equipment, nor personal protective equipment (a respirator).
  - \*\* The declaration applies also to the antiviral R-shield/R-shield Light neck gaiters which were custom-made.
