### PRODUCT DESCRIPTION

#### LONG:

4K60 S+ sports 4K60 HDR10 capture and zero-lag passthrough, an SD card slot for standalone recording, and compatibility with all your favorite PC broadcasting software, including OBS Studio and Streamlabs OBS. Cutting edge onboard HEVC encoding keeps CPU load and project file sizes minimal. Flashback Recording enables you to slide back in time and save gameplay retroactively. Whether live streaming to Twitch or recording on location for a YouTube video, your content looks amazing. Now, you play and capture high-fidelity console games in unaltered 4K60 HDR quality, and record your performance even without a computer.

#### MEDIUM:

4K60 S+ sports full 4K60 HDR10 capture and zero-lag passthrough, standalone recording, and compatibility with leading PC broadcasting software. Simply insert an SD card and hit record to save your performance on location. Or connect your computer via USB 3.0 and instantly elevate your Twitch or YouTube channel.

#### SHORT:

4K60 S+ sports 4K60 HDR10 capture and zero-lag passthrough, an SD card slot for standalone recording, and compatibility with leading PC broadcasting software.

# 4K60 S+
